

Sergio Andrés Moreno Acevedo was appointed Corporate Vice President of Science, Technology, and Innovation at Ecopetrol on July 28, 2025.

He is a Systems Engineer from the Industrial University of Santander, with a specialization in Technology Management. He has more than 25 years of experience in transformation, digital strategy, and innovation, having held key roles in globally oriented companies. He has led digital transformation initiatives.

His career includes high-responsibility positions with multiple achievements in process optimization from tactical, operational, and strategic perspectives, contributing to operational efficiency and service experience. His skills in transformational leadership, strategic planning, adaptability, critical thinking, innovation, and problem-solving stand out.

He serves as CTO (Chief Technology Officer), DPO (Data Protection Officer), and CISO (Chief Information Security Officer) at Ecopetrol S.A. In carrying out these roles, he leads the organization's cybersecurity and cyber defense strategy, aligning his actions with the vision and objectives of the business strategy.
